GREETING

Dear Colleagues and Friends,

It is an honor and great pleasure for us to welcome you to the 10th AOCNR which will be held in Fukuoka, Japan between 5-7 November 2015. Organizing the Congress in Fukuoka in 2015 has been a great challenge as well as a pleasure for all the members of the Japanese Society of Neuroradiology, the Japanese Society of Head and Neck Radiology, and also the Japanese Society for Neuroendovascular Therapy; therefore we are very happy to see you joining us.

The first AOCNR was organized in September 1994, in conjunction with XV Symposium Neuroradiologicum in Kumamoto, Japan. As you know Prof. Mutsumasa Takahashi is the founding president, and he had played a key role in organizing the AOSNR, formerly AOSNHNR, and encouraging us for advancement of neuroradiology and H/N radiology in Asian-Oceanian region. Sadly, Prof. Takahashi passed away on September 16, 2013 following struggle with illness for several years. I believe the succession and continuation of the wishes of Prof. Takahashi is the most important responsibility of all the members of AOSNR.

The 10th AOCNR will provide a full review of the most important aspects of diagnosis and treatment in Neuroradiology and of the latest achievements in this field. This time, we have been working very hard to make the AOCNR 2015 a genuine regional meeting in Asia and Oceania; in addition to the three invited lecturers from the United States and France, therefore, we have selected as many as 79 Asian lecturers for this AOCNR2015 including 43 Japanese and 36 other than Japan. In the scientific sessions, we could also have as many as 49 oral presentations and 121 poster presentations.

A successful congress should have plenty of science, enhanced with entertainment and relaxation, therefore we intend to develop an array of activities that will allow participants the opportunity to feel Japanese cultures, hospitalities and traditions as well as to interact and network with colleagues from all around the Asia and Oceania.

Fukuoka City is close to major Asian cities geographically, which allows many participants from Asia. I hope you will also find plenty of time besides the congress program to discover and enjoy all of the charms our city offers.

Yukunori Korogi, M.D., Ph.D.
